Protection level: NIJ 0106.01 III / NIJ IV customized
Size: 300x250mm or customized
Thickness: 22mm or customized
Type: Single / Multicurve

A black leather-bound book, likely a pocket-sized ledger or notebook. The cover is made of smooth black leather and features a rectangular metal clasp near the top center. Four metal rivets are visible, securing the cover: two on the left side and two on the right side. The book is shown against a plain white background.

A black, bullet-resistant riot shield. It features a rectangular viewing window at the top. Below the window, there are eight mounting holes arranged in two vertical columns of four. The shield has a contoured shape with rounded corners and a slightly flared base.

A dark, textured, shield-shaped plate, likely a protective component, featuring four circular fasteners or mounting points arranged in a rectangular pattern. The plate has a slightly irregular, hand-fabricated appearance with a matte finish.

A black, rectangular device with a small screen at the top and the word 'logo' in white text in the center. The device has a slightly tapered bottom and several small, circular ports or buttons along its edges.

[illegible]
